

## Maintaining health & safety, as we build Georgia's energy future.

Georgia Power contract crews will soon start working in your area of Atlanta and DeKalb. This work is part of Georgia Power's grid investment plan aimed at enhancing service and reliability in communities across Georgia.

We will be placing targeted portions of overhead power lines underground, so they are less prone to damage from trees or vehicles. As a result, we expect fewer and shorter outages in the area once work is complete. During construction, you may see equipment, crews and some traffic closures.

While it's important that we continue this infrastructure work, we are monitoring the COVID-19 pandemic, taking proactive actions, including special precautions like "distancing" to help protect customers and employees from the spread of the virus. If our work affects your property, we have or are in the process of contacting you, but please do not approach workers you see in the area. Where easements are needed, land agents will be contacting property owners by remote means (phone, email, mail or letter attached to mailbox) as a safety precaution. If you have questions, visit [georgiapower.com/grid](https://georgiapower.com/grid) or call us at **1-888-404-1056**.

Thank you for your cooperation as we work to help maintain the health and safety of our teams and customers as we build a brighter energy future for all of Georgia.
